## SKILLS

### Frontend Development

- Built single page applications with user authentication and authorization and CRUD features using React as the view layer and Redux for state management.
- Migrated a single page application from a custom-built JavaScript framework to React v16 with Hooks.
- Developed style guides and reusable Sass components.
- Loaded data asynchronously and manipulated styles based on the state of the SPA.

### Backend Development

- Built microservice RESTful APIs with different technologies like Ruby on Rails and NodeJS and Express.
- Deployed APIs in the AWS cloud environment using Lambda, DynamoDB, Cognito, and API Gateway.
- Architected database schemas according to feature specs following best practices.
- Optimized ActiveRecord DB queries and API calls that reduced load time by +50% in a Ruby on Rails application.

### Software Development Best Practices

- Participated in code reviews and retros after each software development lifecycle.
- Wrote unit and integration tests in the backend and frontend using Jest.

## PROFESSIONAL EXPERIENCE

**Power Muscle Gym, Closter, NJ**  
*Personal Trainer*
